

Instructions for poster map and roof tiles:

In order to conceal the contents of the slum's rooms, we've included roof templates that you can place over your battlemap.

1. Photocopy the next page four times, and this page once.
2. Cut out the roof templates. You will have extras of most of the templates, but you need four of both B and C.
3. When you prepare for your game, lay out the roof templates to obscure the rooms. Lightly affix the roofs with tape. The different-sized roof templates will exactly cover the poster map's areas. Review page 3 for exact instructions.
4. As the heroes explore the decrepit slums, remove each roof in turn. Leave roofs over unexplored areas, leaving players to guess at what danger might lurk within!
